

Rear view camera input activator Crafter/Sprinter W906 Audio15 1x

SKU: OBD-MB-RC15

General

This interface enables the possibility to switch over to the camera input on all levels (radio – CD – navigation – SD) of the Audio 15 unit when the reverse gear of the car will be selected. The set also includes a camera input cable for the connection of an aftermarket camera.

Features

- # Programmed in a few seconds
- # Plug and play
- # Full switch over of the radio unit when the reverse gear is selected
- # Complete with camera input cable (fakra to RCA)

The following is provided in the set

- NavInc OBD Interface OBD-MB-RC15
- 1x camera input cable
- Installation manual
- Warranty
- Invoice

Additional Information

- The connected camera must support NTSC video signals
- Interface must be combined with an aftermarket camera or OEM camera system
- For only one vehicle, after the programming process the interface stores a unique code of the car. This makes the module unusable for other cars.
