

## BMW/Mini iDrive CCC & CIC Bluetooth Carkit interface (BT/USB/SD/AUX)

SKU: BT3-BMW-CxC

### DESCRIPTION

The Bluetooth car kit interface simulates the CD-changer of BMW/MINI via Fiber Optical system (MOST). Due to the interface it is possible to control the telephone through the original radio or navigation system and the steering wheel control buttons of the car. The address book and telephone numbers will be displayed on the radio/navigation display. The car kit is equipped with the latest generation Bluetooth chipset which enables the most modern telephones to connect through Bluetooth with the original system.

Besides the Bluetooth car kit it has also the possibility to play music via bluetooth streaming, USB, SD-card and AUX.

### Features

- Carkit hands-free function via original system
- Phone book support (see table)
- Steering wheel button support
- iD3 tag support (see table)
- Bluetooth Audio streaming support

- USB support (MP3, WAV & WMA)
- SD-card support (MP3 & WMA)
- App audio support (music & navigation)
- Easy menu for music & menu browsing
